

Flashmaps *DB Mapper*

Show your listings on superb flash maps

Show your database listings on great looking, interactive flash maps. Get extended info by clicking on the map; find a listing in the map, show/hide categories and much more!

A great experience

- Display the location of your properties or any kind of listings with superior aesthetics and high-quality printing
- Build state-of-the-art apps by linking a map to a database, and vice versa
- Customize your toolbars, icons, pop-ups, and so on

Pay once, use forever

- Very affordable cost
- No per-hit costs, annual fees or any other hidden costs. Once you purchase and download your system, you don't depend on us anymore

Easy and fast integration

- Simply unzip and have it running
- HTML and POI samples included to cut & paste, duplicate, etc.
- Get your POI database geo-coded online or visually insert the POIs in house

flashmaps

The mapping resource for macromedia® users

Main Features

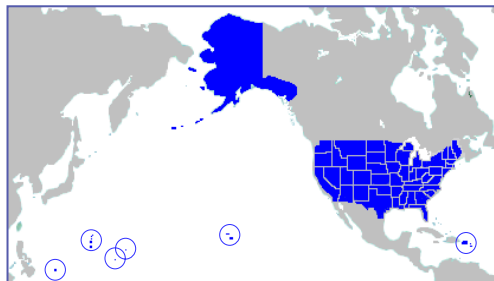

- Unlimited number of mapped locations
- Interactive navigation tools (no reload): zoom in, zoom out, zoom scrollbar, magnifying glass, enlargement to full screen, return to initial view, help and print capabilities
- Flexible import of locations (POIs), from XML files or from dynamic pages, at the beginning or at visitor's request
- Peace of mind: do not depend on Flashmaps or any other third-party service
- Fully adaptable: build your own additional-info pop-ups, including pics, video, audio, links, and so on; or build your own complex icons with ads, pics, animation, etc.
- Easy, powerful and instant (no reload) Javascript_to_map and map_to_Javascript link
 - ✓ Highlight a POI on the map from Javascript
 - ✓ Focus the map on a POI from Javascript
 - ✓ Customized Javascript functions are called when a visitor places the pointer over a POI or clicks on it
 - ✓ Show/hide POI categories from Javascript
 - ✓ Focus the map on certain coordinates
 - ✓ Load a POI collection at visitor's request
- Unlimited load: no mapping server involved, runs on any web server

Best suited for...

- Real Estate firms who need to show at a glance all properties available in a certain area, with popping-up fact sheets and pics just one click away
- Internet-based directories or guides providing information on hotels, shops, restaurants, theaters, attractions, etc.
- Companies in need of real-time tracking of their fleet or personnel (logistics, security, etc.)
- State and County Governments or local Departments wishing to promote their attractions or map any kind of activities.
- Anyone demanding accurate high quality mapping and linking to database
